ABOUT

A passionate Junior Full Stack Developer with extensive training in modern web technologies and practical project experience. Exhibits strong problem-solving skills and quickly adapts to new technologies. Leverages military leadership experience to excel in collaborative development environments. I am committed to creating efficient, user-focused web solutions while continuously enhancing my technical expertise.

SKILLS

Frontend Developer

- React.js, JavaScript
- HTML5, CSS3
- Material-UI, Bootstrap
- Responsive Design

Backend Developer

- Node.js, Express.js
- RESTful API Design
- Server-side TypeScript
- API Integration

Database & Tools

- MongoDB, MySQL
- Git & Github
- Version Control
- Database Optimization

PROJECTS

Second-Hand Gaming Marketplace

A comprehensive e-commerce platform connecting gamers for second-hand video game transactions. Architected React.js/Node.js TypeScript solution with Material-UI responsive design, optimized MongoDB database, and RESTful APIs for authentication and transactions. Implemented user authentication, advanced search with filtering, category-based navigation with pagination, and complete CRUD operations for product and user management.

Appointment Reminder System

An automated notification system that sends WhatsApp reminders for upcoming appointments. Developed Node.js/TypeScript application integrating Google Calendar and Twilio WhatsApp APIs with comprehensive error handling and daily reporting. Implemented automated scheduling through cron jobs, OAuth2 authentication, customizable messaging templates, and specialized validation for Israeli phone numbers and time formatting.
