

## ABOUT

A passionate Junior Full Stack Developer with extensive training in modern web technologies and practical project experience. Exhibits strong problem-solving skills and quickly adapts to new technologies. Leverages military leadership experience to excel in collaborative development environments. I am committed to creating efficient, user-focused web solutions while continuously enhancing my technical expertise.

## SKILLS

### Frontend Developer

- React.js, JavaScript
- HTML5, CSS3
- Material-UI, Bootstrap
- Responsive Design

### Backend Developer

- Node.js, Express.js
- RESTful API Design
- Server-side TypeScript
- API Integration

### Database & Tools

- MongoDB, MySQL
- Git & Github
- Version Control
- Database Optimization

## PROJECT

### Second-Hand Gaming Marketplace | Full Stack Developer

A comprehensive e-commerce platform connecting gamers for second-hand video game transactions

#### Technical Achievements:

- Architected and developed a full-stack solution using React.js and Node.js with TypeScript.
- Implemented responsive UI components using Material-UI, ensuring mobile-first design.
- Designed and optimized MongoDB database schema for efficient game inventory management.
- Built RESTful API endpoints for user authentication, product management, and transactions.

#### Key Features:

- User authentication and profile management.
- Implemented advanced search and filtering capabilities for improved user experience.
- Implemented category-based navigation and pagination system for efficient product browsing.
- Developed complete CRUD operations for product management and user profiles.
